

HOW EXPOSED ARE YOUR ASSETS TO THE NEXT CATASTROPHIC WILDFIRE?

RZRisk identifies the likelihood a specific property will experience damage from wildfire.

SOAP and REST API

Integrate our API directly into your underwriting process with a monthly or annual subscription.

Secure Online Portal

Obtain individual risk reports on demand by using our intuitive map-based web application.

DELIVERY OPTIONS

Batch Processing

Receive risk scores for your entire book of business. Run all of your properties through our risk model and get a spreadsheet showing each properties' score.

ADVANCED FIRE SCIENCE

RedZone's wildfire model provides unprecedented clarity on the potential for damage to properties, including their susceptibility to:

- Direct flame impingement
- Ember showers
- Smoke damage

SCORING METHODOLOGY

RZRisk provides a single score with additional details to help you understand what factors contribute to the risk profile for each property.

Overall Score	A single easy-to-use score
Frequency	How often a fire will occur here
Severity	How severe a fire would be
Fire History	Previous fires in this area
