

BE READY AND
**STAY
INFORMED**

WHEN THE NEXT
NATURAL DISASTER OCCURS

RZAlert provides monitoring and analysis of natural disasters to keep you informed.

Monitor

The industry's most comprehensive collection of real-time disaster feeds detects emerging threats in real time.

Analyze

Sophisticated geospatial platform identifies threats to your assets and calculates the risk of loss and financial exposure to your assets.

HOW IT
WORKS

Inform

Notifications delivered by email and online with critical details, weather updates, maps and tools to help you communicate.

Respond

Make informed business decisions to manage claims response efforts, minimize financial losses and reduce impact to your assets.

RZALERT DASHBOARD

The RZAlert Dashboard offers secure real-time online insight, key analytics and messaging for active incidents and their impact on your assets.

RZALERT ADVANTAGES

- Deliver custom notifications to key stakeholders tailored for your operations.
- Disaster intelligence analysts available to assist you with generating reports, calculating detailed analyses or developing a tactical response plan.
- Customer engagement allows users to efficiently communicate both internally and externally using customizable templates to inform and/or initiate action.
