

## Wildfire Risk Mitigation Worksheet

- No vegetation within 3-5 feet of all structures
- Thin out trees, shrubs and other vegetation within 30 feet of house
- No flammable vegetation within 100 feet of house
- Keep combustible materials at least 30 feet from structures (firewood, gas grill, etc.)
- Clear gutters, rooflines and underneath decks and porches of needles, leaves and trash
- Screen vents (such as attic and foundation) with corrosion-resistant wire mesh
- Cover chimneys and stovepipes with spark arrestors
- Avoid flammable roofing materials
- Treat wood siding with UL-approved fire retardants (semi-permanent solution)
- Use thermal glass in windows and fire-resistant curtains or blinds
